The Bootloader: The software that manages the boot process of your computer. For most users, this will simply be a splash screen that pops up and eventually goes away to boot into the operating system. The kernel: This is the one piece of the whole that is actually called "Linux". The kernel is the core of the system and manages the CPU ...

The Complete Beginner's Guide to Linux - Linux.com

A continuous rotation servo (sometimes referred to as a full rotation or just 360° servo) behaves more like a standard DC motor. Instead of controlling the position of the servo, the controller sets the speed and direction of the motor. Continuous rotation servos work well as drive motors or other applications where you need to control the speed and direction of a motor with just a few wires.
