Families are often regarded as a wellspring of social capital generation or destruction. Some commentators centre families, treating them as the main focus of their arguments. Others, however, decentre families: they acknowledge families as a key source of social capital but then shift their focus elsewhere. In this section we highlight families.

Families and Social Capital: Exploring the Issues

This book examines a range of family caregiving situations. It makes a case for facilitating the development of social capital by strengthening the capacity of informal caregivers and caregiver groups, and by improving links with formal care organisations.
