NEC 2005 has incorporated a brand new article, Article 409, to facilitate the safe design, marking, installation, and inspection of industrial control panels (ICP). The new article closes the loop and addresses areas of inconsistencies found in previous versions of the National Electric Code (NEC).

### **Understanding NFPA, NEC 2005 Article 409**

Overview. The introduction of the new Article 409 for Industrial Control Panels in the 2005 Edition of the National Electrical Code (NEC) drew increased attention to installations of industrial control panels. Industrial control panels (ICPs) with the UL Mark are installable to the NEC and have a distinct competitive edge in the marketplace. UL offers training in constructing industrial control panels in accordance with UL 508A.

### **UL 508a Training on Industrial Control Panels | UL**

UL 508 covers control devices up to 1,500V and UL 508A covers Industrial Control Panels up to 600V. They are closely related; however, to comply with NEC Art. 409, the equipment can comply with UL 508A, Supplement SB, not UL508, even though most of the components would probably be UL 508 listed. I apologize for the confusion.
