This was the foundation for the development of ASTM E-11 used in particle analysis today and would become a staple of W.S. Tyler's reputation. The principle of this sieve series became so essential, that it was adopted as a national standard by the United States and many foreign countries. Certain sieves were proposed as the basis for an international sieve standard. To meet the need for faster, more reliable means of testing, Tyler developed the Ro-Tap Sieve Shaker in 1914.
